Office Action Summary	Application No. 10/539,565	Applicant(s) LAITINEN ET AL.	
	Examiner Robert Landsman	Art Unit 1647	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The Restriction Requirement mailed 1/12/09 has been withdrawn in favor of a new restriction since Applicants' representatives informed the Examiner that a separate set of claims should be the subject of the Restriction Requirement.

1. Lack of Unity

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-17, 24-29, 32 and 33 as drawn to a method of detecting a risk of a pulmonary disease by determining a polymorphism in a GPRA gene and a kit.

Group II, claims 18-23, as drawn to a method of identifying a polymorphic site in a GPRA gene

Group III, claims 18-23, as drawn to a method of identifying a polymorphic site in an AAA1 gene

Group IV, claims 34-39, 24, 25, 30 and 31, as drawn to a method of detecting a risk of a pulmonary disease by determining a polymorphism in an AAA1 gene and a kit.

Group V, claims 40 and 41, drawn to a method of identifying a haploid combination

Art Unit: 1647

C. The inventions listed as Groups I-V do not meet the requirements for Unity of Invention or the following reasons:

Groups I-V are drawn to separate, distinct inventions and are distinguished from each other because the special technical features which define them by chemical and physical characteristics i.e. structure/function, as well as biological functions are different and these special technical features are not shared by each invention. Since these special technical features are not shared by each product and since the common features do not establish an advance over the prior art, the inventions do not form a single inventive concept within the meaning of Rule 13.2

Groups I-V are drawn to methods different in design and performance, and which do not share the same or a corresponding special technical feature which define the contribution of each invention. The methods of Groups I-V do not share a corresponding special technical feature because the methods are practiced with materially different process steps for materially different purposes and each method requires different starting materials, process steps and goals. Since these special technical features are not shared by each process, and since the common features do not establish an advance over the prior art, the inventions do not form a single inventive concept within the meaning of Rule 13.2.
